KEY PROJECTS

Selection Key (MCQ Quiz App)

(April 2022)

In this project we have created an android app (Selection Key) by which student can prepare for their exam. In our app lots of tests available of Different types on entrance exam.

Technologies used: Android Studio, Java, XML, Firebase.

Face Mask Detection (ANN)

(October 2021)

Our project is to prepare a data set which would detect whether a person on the camera is wearing a Face Mask or not.

Technologies used: Python, OpenCV, Numpy, TensorFlow.

Total C And Jee (Website)

(March 2020)

.In this project I have created a education platform website.Where we can upload study material which is downloadable and provide student to enroll free courses and able to see new video playlist and much more.

Technologies used: Html, CSS and JavaScript

Github Link: <https://vikas2518op.github.io/Total-C-And-Jee/>

TECHNICAL SKILLS

- Programming Languages: C, C++, Java , Python .
- Web Development: HTML, CSS, JavaScript, Bootstrap4,
- Database & Operating Systems: MySQL, Firebase, Linux
- Android App Development : Android Studio ,Android App using Java

ABOUT

A quick learner, open to new opportunities and passionate about work. Currently pursuing my B.Tech in specialisation Computer Science Engineering from Amity University Mumbai, I always give my best in whatever I do also looking for some new opportunities in IT industry.

CERTIFICATION

- Full Stack Web Development
- Android App Development
- Ethical Hacking

SCHOLARSHIP AND ACHIEVEMENTS

- 25% Scholarship in Amity University Mumbai in First Year.

AREAS OF INTEREST

☐ Competitive Coding , Web-Development, Problem Solving ☐.

LANGUAGES KNOWN

English , German , Hindi , Marathi , Bhojpuri.
